

RSP-series

RSP

Rotar Static Pulverizer

Incredible cutting power combined with easy to replace wear parts make this Rotar Static Pulverizer the perfect concrete pulverizer for secondary demolitions. The RSP-series can easily crush the concrete and remove the reinforcement.

Replaceable teeth

The Rotar Static Pulverizer has been fitted with replaceable teeth. It's impressive to watch these rows of teeth cutting through the extremely strong concrete. The design of the jaws guarantees powerful penetration of the material.

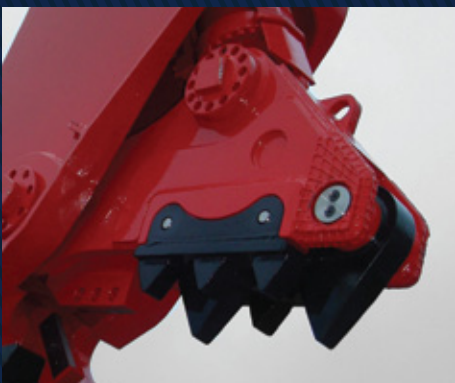

Specially developed speed valve

The speed valve that was specially developed by Rotar makes sure that the jaws close quickly and that they switch from speed to power mode as soon as the job requires cutting power. The pulverizer's body has been assembled from high-grade and wear-resistant materials, making it extremely strong.

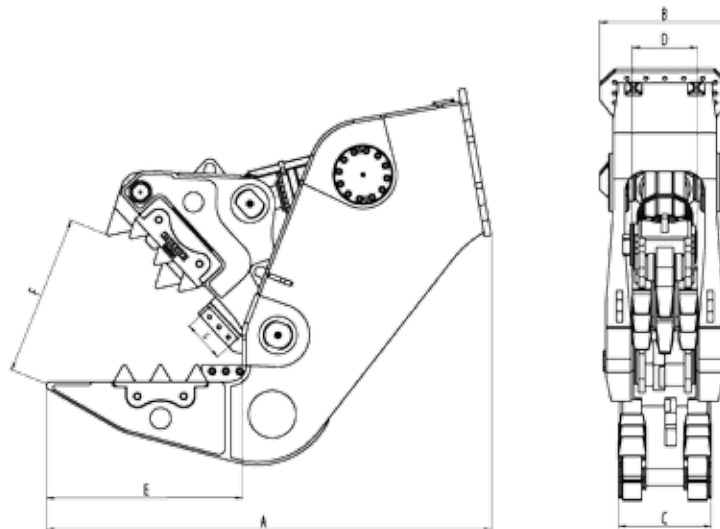

Cross-mounted hydraulic cylinder

The cross-mounted hydraulic cylinder ensures optimal efficiency of the cutting power and a compact design with a favourable centre of gravity. The large diameter of hoses, bores and pipes reduce the return pressure in the hydraulic system and contribute to this pulverizer's extraordinary performance.

Specifications

Ingenious, reliable, service-friendly, fast cycle times and enormous cutting power.

Type RSP	25 S	32 S
Information		
Machine class (t)	20 - 30	28 - 45
Weight (kg)**	2350	3800
Cycle open/close (s.)	2,2 - 1,4	3,0 - 3,4
Closing force at tip of jaw 1 (t)	70	105
Closing force at tip of jaw 2 (t)	105	158
Rotar Hole-pattern	140-150	140-150
Dimensions		
Dimension A (mm)	2400	3120
Dimension B (mm)	620	620
Dimension C (mm)	440	520
Dimension D (mm)	310	400
Dimension E (mm)	911	1110
Dimension F (mm)	860	1160
Dimension G (mm)	200	200
Hydraulic		
Max. operating pressure motor (bar)	350	350
Oil volume cylinder (L/min)	250	250
Connector size	G 1 1/4"	G 1 1/4"

* Dimensions under construction

** Weight exclusive adapterplate with bracket
