

TERRAFIRMA EQUIPMENT: WE ARE HAPPY TO HELP YOU!

Terrafirma is a one stop shop for heavy equipment, offering sales, rentals, parts, service and financing on a large range of demolition and construction equipment.

The equipment at Terrafirma allows their clients to tackle any job with the utmost care for the environment. Attachments are available for small, medium and large excavators from an inventory of compaction units, hydraulic breakers, grapples, shears, pulverizers, crunchers, rail cutters, and more! Excavators are available for use with and without attachments.

Terrafirma offers:

SBM Aggregate Processing Equipment

- Jaw Crushers
- Impact Crushers
- SMR 10/5/4 Horizontal Impact Crusher

SBM Concrete Mixing and Recycling Plants

- Mobile or Stationary
- Supply solutions to meet each and every demand

LINTEC Asphalt Mixing Plants

- Containerized & Highly Mobile
- High Tech and Efficient
- CSD & CSM Lines Available

Excavators with Specialty Attachments

- Hydraulic Hammers
- Compactors
- Pulverizers
- Steel Scrap Shears & Much More!!

Now with Terrafirma's financial services, it has never been easier to purchase heavy equipment and attachments for your business.

SMALL STEPS IN MAKING NEW PLACES WITH SUSTAINABLE SOLUTIONS

INTRODUCTION TO TERRAFIRMA EQUIPMENT

ASPHALT MIXING

HO-PACS

HEAVY EQUIPMENT AND ATTACHMENT RENTALS

We rent and sell a wide variety of excavators and attachments suitable to the construction and demolition industries:

Aggregate

Mobile crushers, screens, and scalpers are available for any size processing task.

Excavators

Small, medium and large excavators for any job, specially plumbed to run attachments.

Breakers

The most economical way to reduce aggregates for secondary breaking.

Tampers

Hydraulic compactors can be used to compact soil, break apart materials, and drive posts.

Shears

Metal shears, pulverizers, rail cutters and rebar cutters are ideal for any demolition job.

... and More

There are even more attachment options including magnets, grapples, augers, and buckets.

THE FUTURE OF CRUSHING IS HERE

Terrafirma Equipment is excited to be SBM's Canadian dealer for aggregate processing equipment.

The diesel-electric drive system of these mobile crushers enable them to have lower fuel consumption over other drive systems.

SBM's state of the art mobile crusher line processes natural aggregates, ores and coal as well as recycles construction materials. The SBM mobile crusher provides constant production, high mobility, short set-up times and high safety standards, all resulting in increased profitability and value.

From concrete mixing plants to crushers to residual concrete reclaiming plants, the cutting edge equipment from SBM is helping Terrafirma pave the way to a brighter, more sustainable future.

Concrete Reclamation

SBM also manufactures concrete reclamation plants to increase profits, save water and aggregates, and protect the environment.

A POWERFUL PARTNERSHIP

Terrafirma Equipment has joined forces with LINTEC GmbH to represent their innovative line of asphalt mixing plants throughout Western Canada.

The LINTEC concept offers numerous equipment options to help clients meet the specific project requirements while the 100% ISO sea container design sets the standard for mixing plant mobility and in-design safety features, proving to be a superior investment on all fronts.

CSD Series - Unique and patented screen drum technology

CSM Series - Sieving with conventional vibration screens

Modular Plant Concept

- Easy and economic transport
- Quick set up
- Low operating costs
- High energy efficiency
- Superior product

Terrafirma equipment is taking clients from quarry to road with the greatest of ease.
